

## CAUTION OF USE

**After use, be sure to unplug before pouring off the water (solution).**

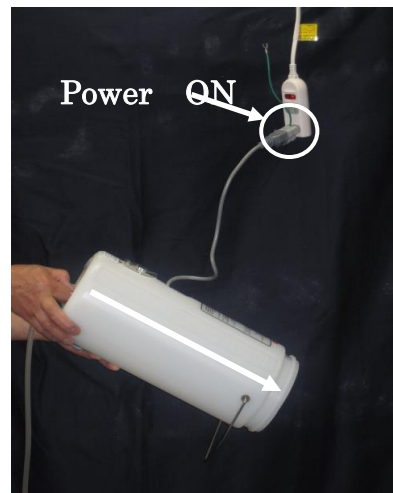

Even though with boil-dry safety mechanism, in case you turn the container upside down, switching on the power (Drawing 1), float power is on, and becomes power on and boil dry. It causes water leakage under the name plate.

 PROHIBITED

Drawing 1  
(The container upside leaving power on)

 PROHIBITED

Drawing 2  
(The container laid down leaving power on)

**When you pour the water and when you pour off the water after use, pay attention not to water the temperature control parts and round thermometer.**

If temperature control part and round thermometer is leaked fluid into, temperature control becomes unstable and it may result in burn and malfunction. Due to electric fire, the circuit breakers may be thrown and become unusable.
